

Ass. Prof. Dr. Martin Boďa, PhD.

currently serves in the official structures of the Slovak Statistical and Demographic Society as its Secretary General (since 2019) and Vice-President for International Relations (since 2023). He works in academia at the position of Senior Lecturer at the Faculty of Economics of Matej Bel University in Banská Bystrica (Slovakia), the Faculty of Natural Sciences and the Faculty of Social and Economic Studies of Ján Evangelista Purkyně in Ústí nad Labem (Czechia), and the Faculty of Economics and Administration of the University of Pardubice (Czechia). His scientific profile sprouts out of a highly diversified schooling across the fields of economics and finance (finance, banking & investment, tourism) and quantitative methods (mathematical statistics & financial mathematics, probability & mathematical statistics, econometrics & operations research). His recent professional profile can be broken down into three chief blocs: (i) macroeconomic empirics associated with economic cycles and growth, (ii) theory and applications of data envelopment analysis, (iii) prediction of corporate financial distress.
